## Your needs. Our drive

## Industeel heavy forming division

#### Industeel heavy forming

division located in Saint Chamond (France) is made up of a team of 40 experienced Engineers and Technicians whose objective is to produce and deliver pieces that fully meet your needs.

#### Key parameters for manufacturing of parts (design code, dimensions and material specification) are usually provided will be translated by our

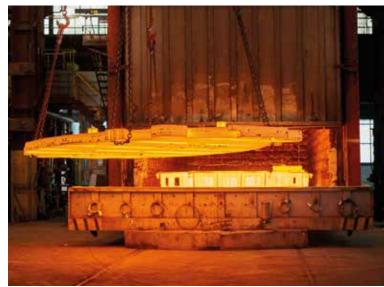

engineering department

into the Saint Chamond

production process.

We can also support you in design optimization and the clarification of material specification with the support of our metallurgists and R & D centre.

For several years St
Chamond heavy forming
division has produced
tailor-made and complex
shapes with the most severe
material specifications for oil
& gas offshore equipment,
defense applications,
nuclear industry, refining
and petrochemicals.

## Production tools for every shape

## A unique set of equipment to meet your needs

Tailor-made pieces require reliable and efficient production tools. St Chamond forming division has a unique set of equipment able to meet your needs:

2 forming presses (1200 tonnes and 12 000 tonnes) that can process any kind of steel (carbon, low alloy or stainless steel)

Quality heat treatment furnaces carefully controlled to carry out a variety of heat treatment (annealing solution, tempering, stress relieving...) under optimal conditions

A 5 m deep water quenching bath with a stirring system and water temperature control to ensure homogeneity of properties of heavy wall thickness pieces

Processing and control equipment (machining, shot blasting, flame cutting, NDE) that guarantee parts that are delivered fully meetingn client expectations

12 000 tonnes forming press

Quenching of formed head

Oxycutting crane

Since health & safety and quality are nonnegotiable requirements for industries we serve, our entire production workflow has been approved by the most demanding internal and third-party control systems, including world's leading design and certification bodies (ASME, ISO 9001, ISO 140001, TUV).

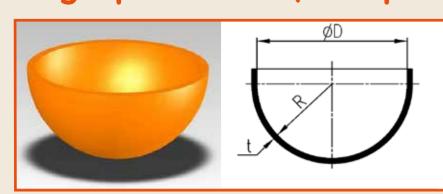

We are also compliant with demanding design codes for equipment dedicated to nuclear power market (RCCM, ASME III).

#### Our offer: a wide range of formed products Industeel

# **ArcelorMittal**

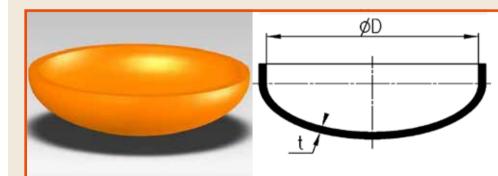

## Single-piece heads (hemispherical, elliptical)

#### **Hemispherical (1/1)**

ØD: 1000 - 3500 mm Thickness (t): 50 - 250 mm

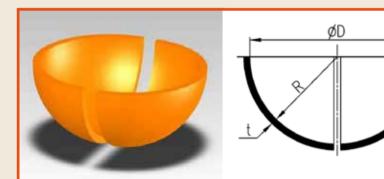

#### Elliptical (1/1)

ØD: 1000 - 3600 mm Thickness (t): 50 - 250 mm

## **Multi-piece heads**

Two-piece heads ("2/2") (hemispherical)

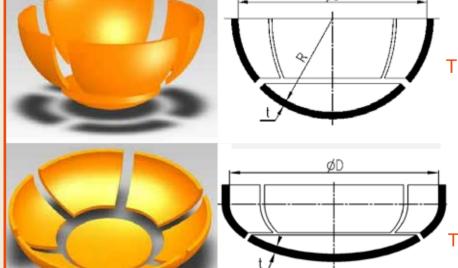

#### Hemispherical (2/2)

ØD: 3500 - 6500 mm Thickness (t): 50 - 250 mm

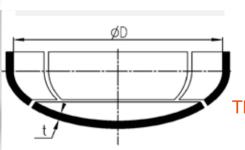

### Crown and petals (hemispherical, elliptical)

#### **Hemispherical**

ØD: 6501 - 10000 mm Thickness (t): 50 - 250 mm

## **Elliptical**

ØD: 3600 - 10000 mm hickness (t): 100 - 250 mm

Dimensional limits are provided for information. A tailor-made study of your request will be carried out by our design office.

## Manufacturing route sequences

## Other tailor-made products

Cones

#### Half shells

ØD: 1000 - 7500 mm

## **Connection pieces**

for submarine

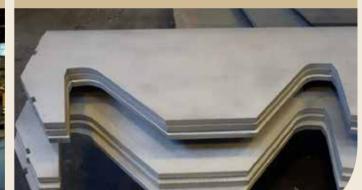

Chords for jack-up leg

**Special protection steel** components for armored vehicles

ydro-electric applications

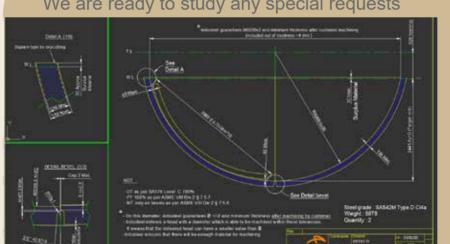

## Additional tolling services: Our facilities and expertise to support your needs On request you can also entrust us special forming operations, heat treatment or surface treatment on products supplied by you

Offshore platform

### **Engineering & Design**

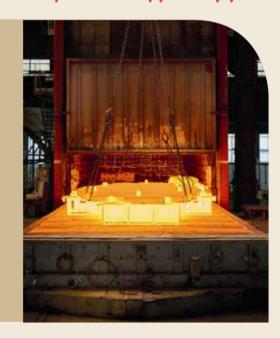

We are ready to study any special requests

### **Quality Heat treatment**

3 bogie hearth furnaces 14.3 x 4.25 x 2.00 m 13.0 x 2.00 x 1.15 m 11.0 x 4.90 x 3.30 m

1 mobile roof furnace 15.5 x 6.50 x 5.30 m

### High precision levelling & forming

2 forming presses 1200 tonnes and 12000 tonnes

## Processing

Rotative flame cutting Non-destructive testing Shotblasting Chamfering Machining
